CHALLENGER

A full makeover takes Challenger to a whole new level and makes it an irresistible choice for 2023! Its new on-trend lighter interior creates a welcoming feeling of space and a host of external upgrades makes it an even better value for money choice.

CHALLENGER GRANDE

Delivering all the loved Challenger features, the newly renamed 8-ft wide Challenger Grande range brings valuable space, making it ideal for families. From the wider beds and greater storage to the fully equipped kitchen and newly designed washroom. Select from four four-berth models or the new 670 six-berth due to launch in the latter part of the season, with rear French bed and bunk bed.

SMART is the basis of our intelligent construction system, used across our entire touring caravan range. Strong, Modern, Aerodynamic, Resilient and Tested, you can be assured your Swift caravan is a high quality engineered product.

STRONG

The Strong timberless body frame uses PURe, a tough, hard polyurethane based product that is totally impervious to water and has been proven through use.

MODERN

The SMART construction system uses Modern materials, and has been developed to ensure the exterior profiles maintain the Modern, desirable looks our caravans are renowned for.

AERODYNAMIC

We continue to lead the way in Aerodynamics, using Computational Fluid Dynamics to help shape the bodysell for better fuel consumption and safer towing.

RESILIENT

All fixings are made into the PURe material to a pre-defined depth. PURe is totally impervious to water and has no veins. This means there is no passage for water from the outer skin, making the caravan highly Resilient against moisture.

TESTED

Extensive safety Testing at the Millbrook track, plus cold chamber Testing down to minus 15°C and beyond, puts prototypes through conditions most products will never have to experience in a lifetime; all part of the Swift ethos to deliver the best products to you.

HAIL RESISTANT GRP ROOF

Woven GRP outer surface provides greater durability from the elements.

GRP SIDEWALLS

Balanced panel side walls with GRP outer and inner skins. GRP is more impact resistant than aluminium and can be easily repaired, ensuring long lasting good looks and helping protect your investment for the future.

FLOOR CONSTRUCTION

'Sandwich' floor construction with ply upper, high rigidity Styrofoam core and GRP outer skin to provide greater durability from the elements.
